

# Large star point cutout pattern

(note: do not cut individual coroplast sections from this pattern.

Also, you may need to extend the pattern lines  
as your printer may not print the furthest most lines)

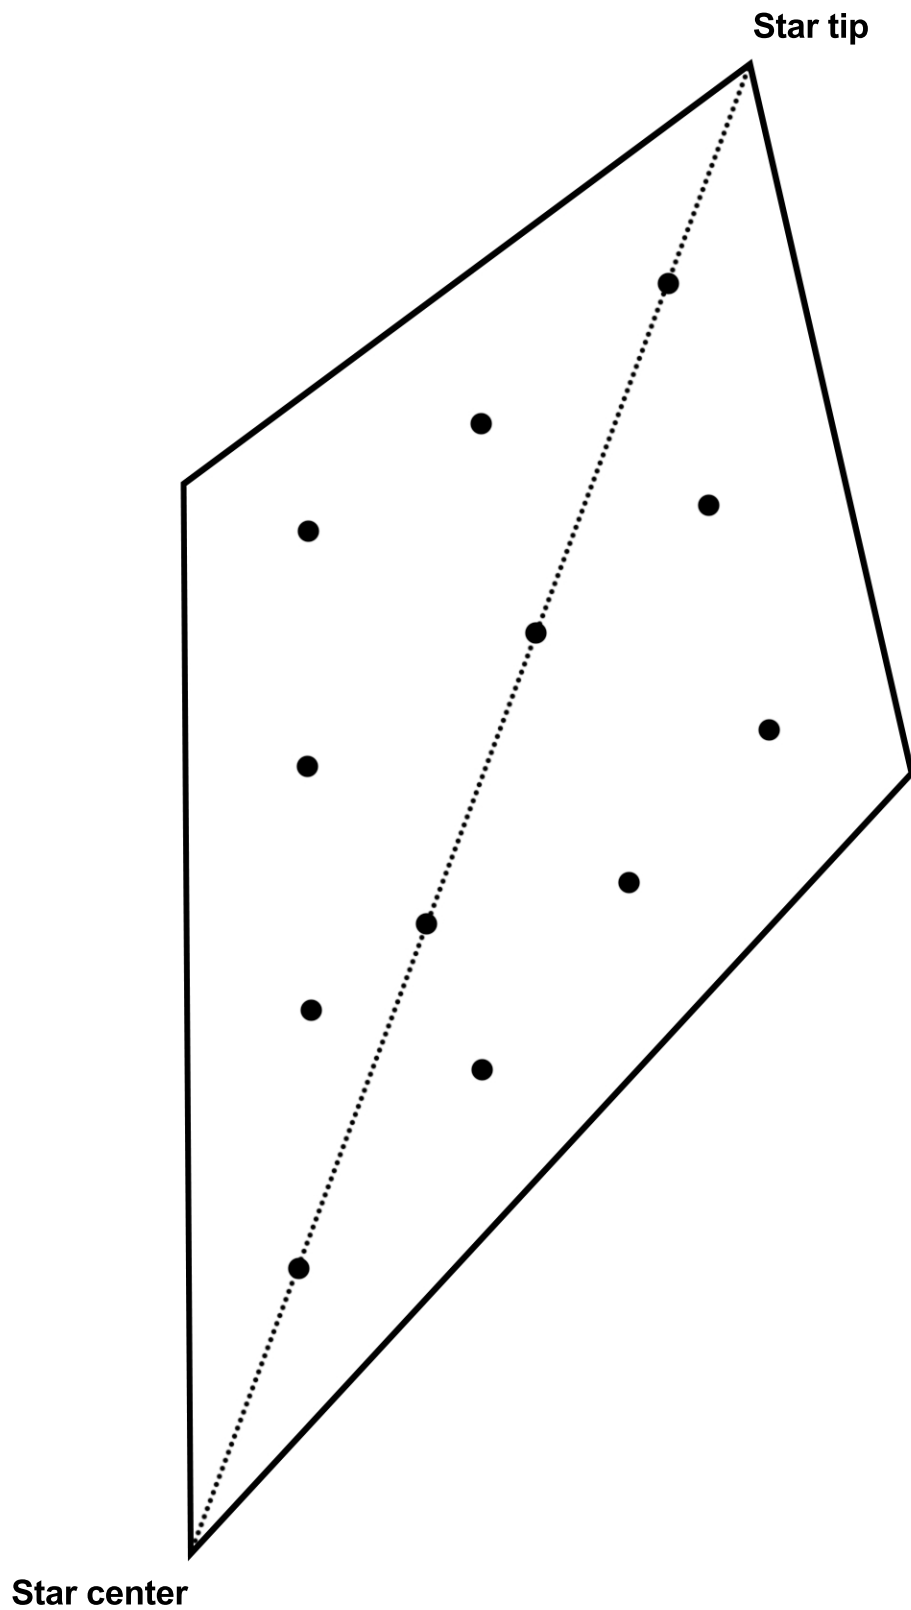

Star tip

Star center

# Small star point cutout pattern

(note: do not cut individual coroplast sections from this pattern)

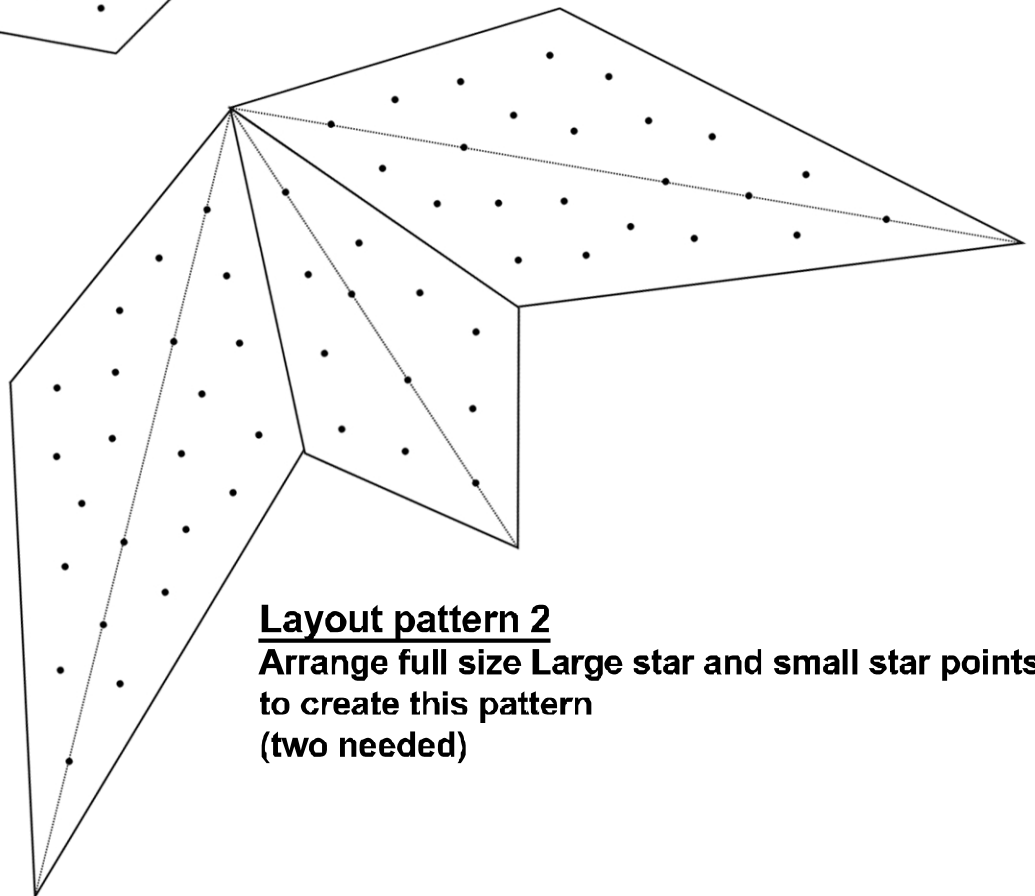

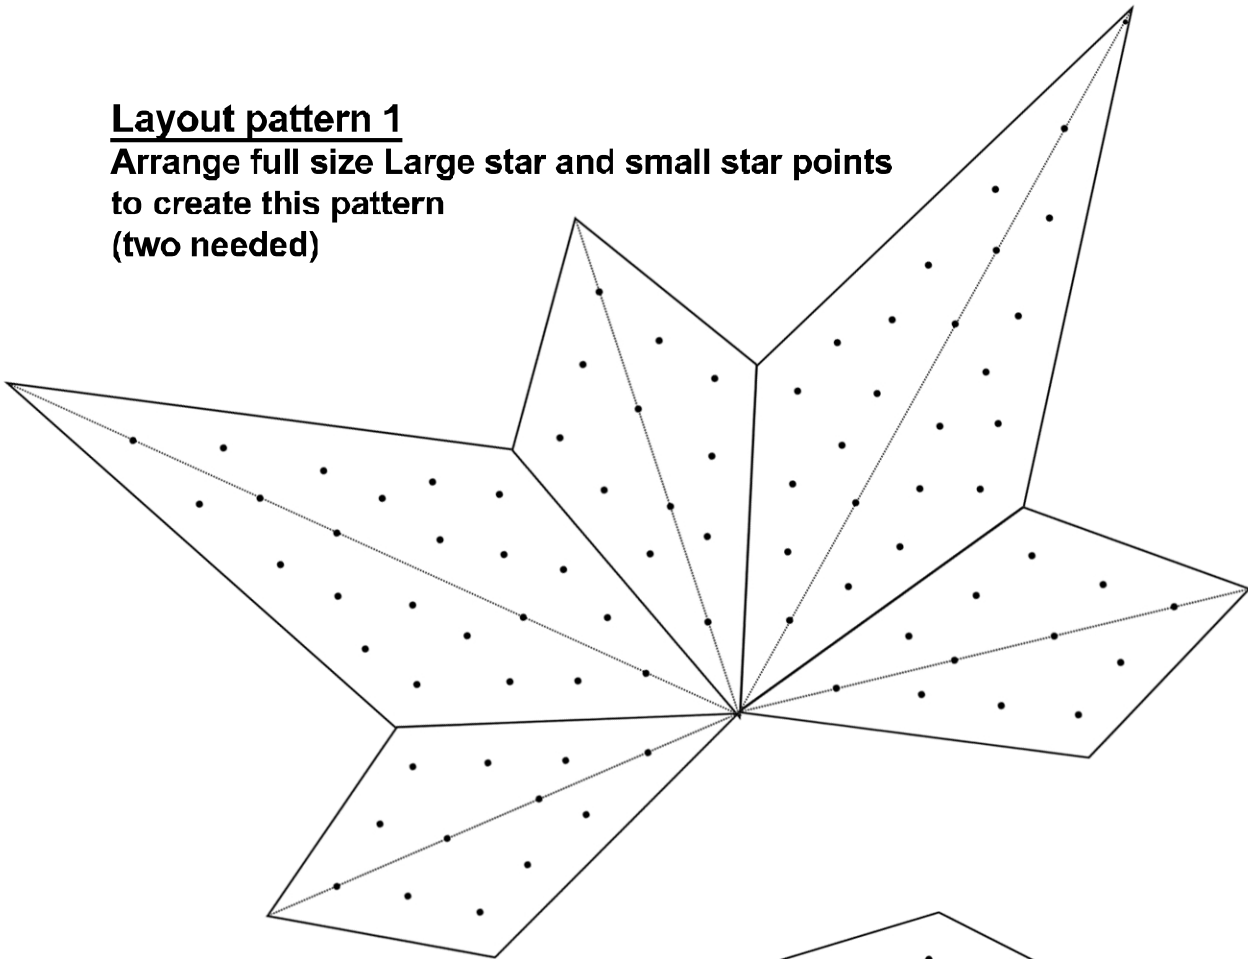

## Layout Pattern

cut only outside lines, see full assembly guide for internal scoring

### Layout pattern 1

Arrange full size Large star and small star points  
to create this pattern  
(two needed)

### Layout pattern 2

Arrange full size Large star and small star points  
to create this pattern  
(two needed)

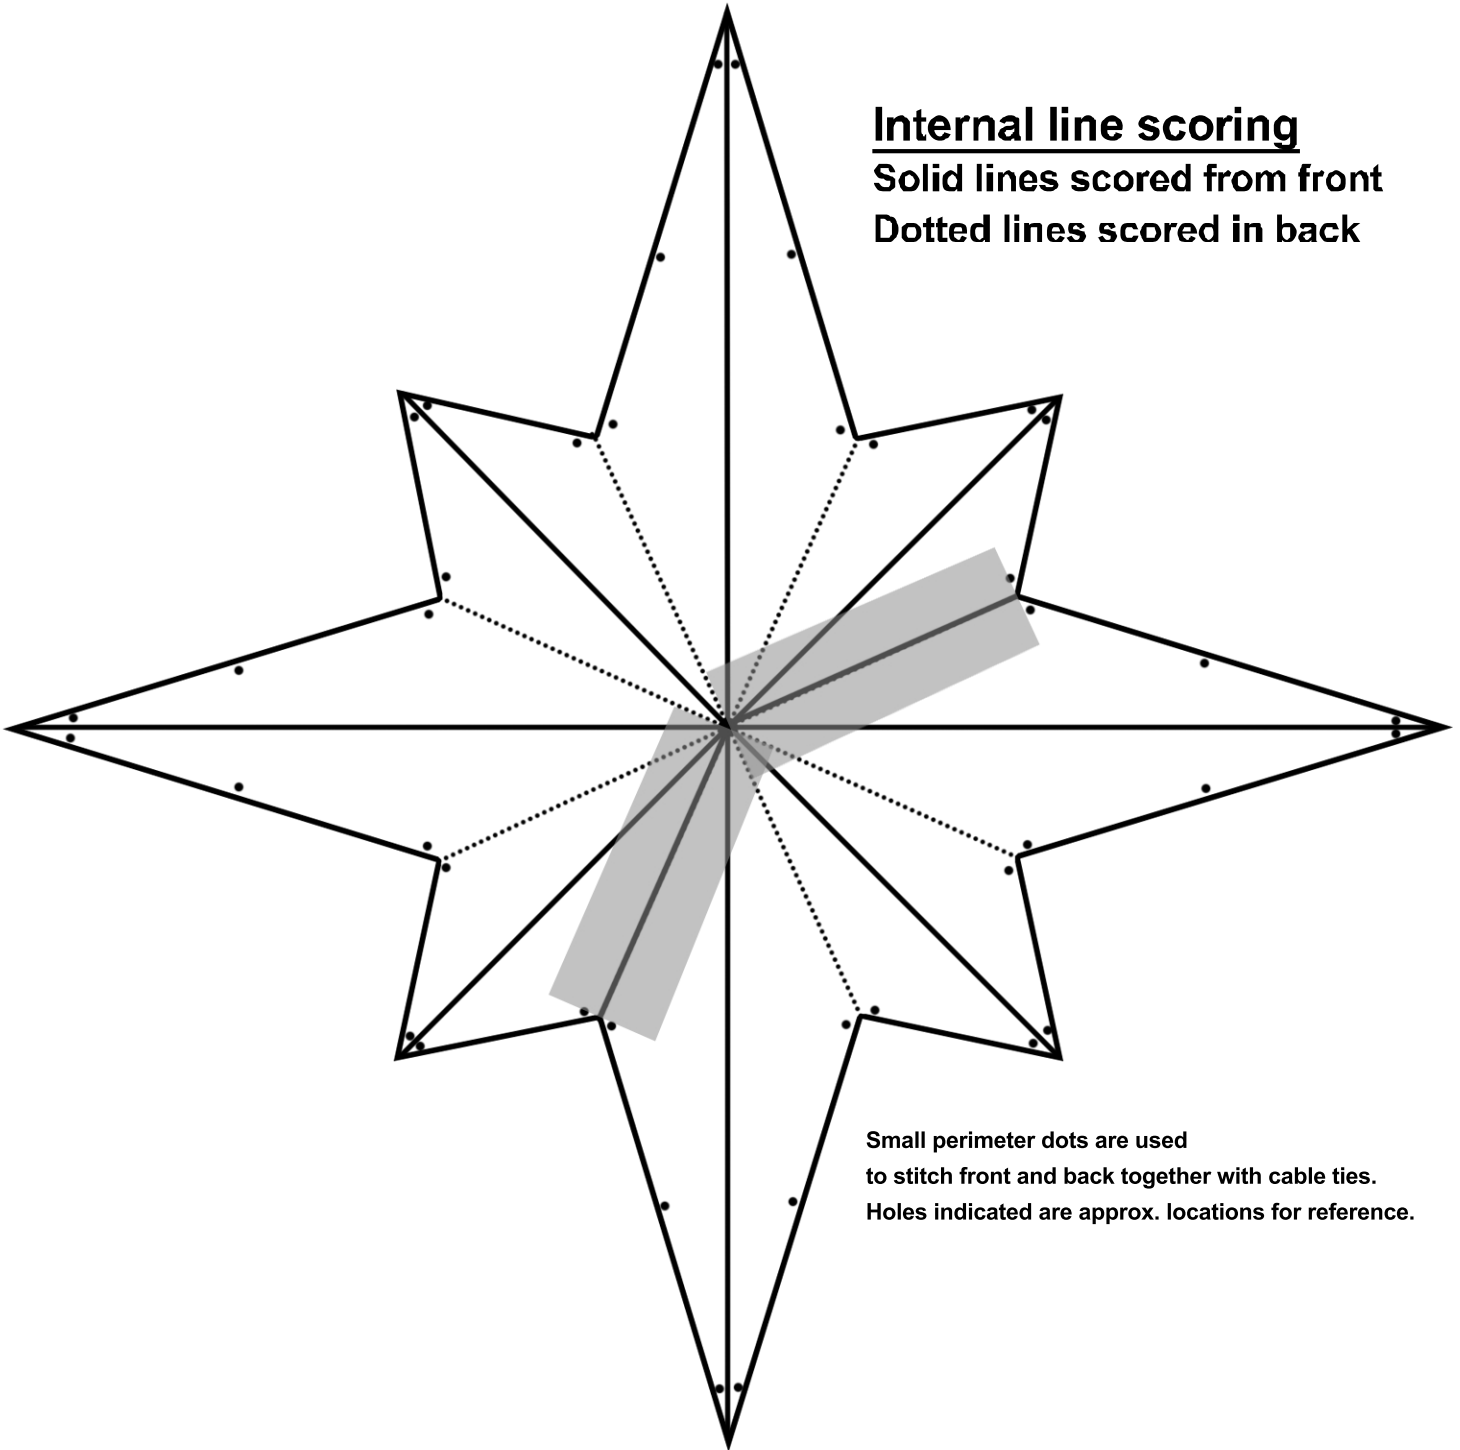

## Full assembly

Two are required, one with bulb holes for front and one without for back

### Internal line scoring

Solid lines scored from front

Dotted lines scored in back

Small perimeter dots are used  
to stitch front and back together with cable ties.  
Holes indicated are approx. locations for reference.

Duct tape strips used to fuse both star sections together  
on inside of star
